SUKHMEET PANESAR

London, UK

Sukhmeet trained as a clinician in emergency medicine and public health in London and has developed a unique set of skills for a clinician in the domains of management consultancy, health policy and academia, all at senior level. Furthermore, he has published widely in the field of health services research specifically patient safety and health system redesign (200+ publications). He has worked for prestigious consultancy houses such as EY and Accenture where his work has focussed on the national programme for new care models. These models laid the foundation for future integrated care systems, and some elements of the national programme such as evaluation and digital collaboration have been viewed as exemplary. Most recently, he led on digital transformation, strategy and planning across a large group of 2300+ individuals aggregated together to combine the data and analytical teams across NHS England, NHS Improvement NHSX, NHS Digital and Health Education England and bring them under a unifying operating model to support integrated care systems deliver population health management initiatives and data analytics at scale. He also led on the national federated data platform strategy. He has a portfolio career now as a fractional CxO working for Monstarlab where his core focus is on developing super apps and great patient experience in healthcare. He is also supporting some clients under NDA to develop their value propositions for a bigger global footprint in the MENA and APAC regions.
